SAFETY INSTRUCTIONS :

Do not stare directly into the filter light for any period of time.

If the light from the Dandruff Brush begins to darken, change out the batteries.

This unit is for USE ONLY as directed in directions. Read and follow all instructions that are on the product or provided with the product.

Use only two "AAA" batteries. (not included)

Keep out of reach of children.

To clean the exterior of the unit, use a mild solution or dishwasher safe detergent with water.

If device appears to be damaged DO NOT USE.

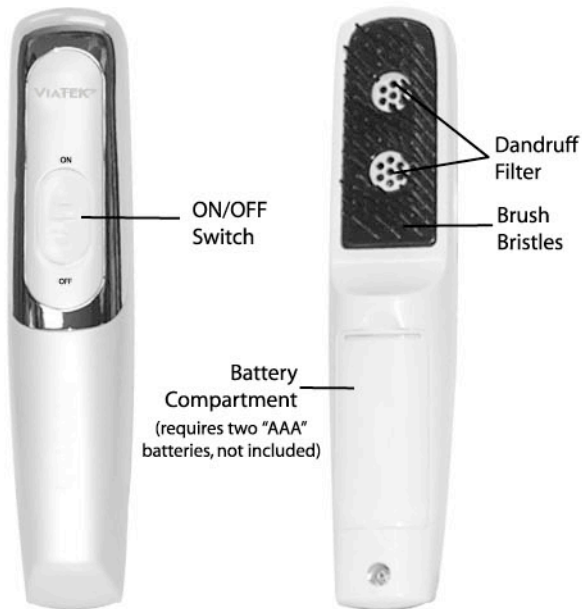

DO NOT operate the unit where there is flammable or combustible products or where other flammable vapors are present.

Any attempt to open the unit will void the warranty.

DO NOT insert any objects in the unit.

Keep unit free of hair, dirt, etc. Clean any loose hair out of the product immediately after using it.

PARTS DIAGRAM:

INSTALLING BATTERIES:

1. Remove the battery compartment cover by pushing down and pulling it off. *Diagram A.*

Install two "AAA" batteries (not included) following the correct polarity position, then place cover back on. *Diagram B.*

OPERATING THE UNIT:

3. To turn the Dandruff Brush **ON**, push the **ON/OFF** switch upward towards the top of the brush. (**ON/OFF** is indicated on the brush.) To turn **OFF** the brush, push the switch down towards the handle of the brush. *Diagram C.*
4. Once the Dandruff Brush is turned **ON**, simply brush your hair in a normal fashion. Starting at the root of the hair and brush down to the end of the hair. This state-of-the-art technology will begin to break down the epiphyte's in the scalp. *Diagram D.*

Recommended use of the Dandruff Brush is 5 minutes a day when the hair is not completely dry from cleansing (bathing). Continue to use the brush daily for 3-4 weeks to see significant dandruff reduction.
