

ADVANTAGES

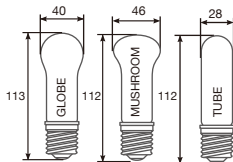

This revolutionary technology provides a unique solution to the heat dissipation of LED as well as the luminosity.

First in the world to operate under alternating current in liquid medium without voltage conversion.

THE MOST

- Indirect Lighting, Angle of Reflection ≤ 240
- Operable with a voltage dimmer at 30% to 100%
- CRI ≥ 70
- Without overheating the light bulb
(under a 48 degree Celsius working environment continuously)
- Water-resistant against humidity

DIMENSIONS (mm)

ATTENTIONS

The liquid contained in the light bulb is harmless, without danger to man and animals. In case of glass breakage, please take necessary precautions during usage and wash hands and eyes with water abundantly whenever necessary. (Oil from SHELL Ondina Oil 68, used in medicine and baby oil as non-toxic and non-flammable oil.)

CAUTION
Do not use
in enclosed
fixtures.
