

Instructions for the Miche™ Bag

detach

1. Covers or “Shells” are attached to the base bag by simply placing the shell’s decorative side down on a clean surface:

2. Set the base bag directly in the center of the shell; then

3. “Flip” the sides up and the shell is attached. Make sure the top edges and corners of the shells match up evenly with the top edges and corners of the base bag for optimal appearance and functionality.

To take shells off your Miche™ Bag, simply pull the top side of the shell away from the base. Do not pull the corners as they could bend.

Instructions for Exchanging the Handles.

Enclosed you will find a set of long handles which converts your Miche™ Bag into a Miche™ shoulder bag. Simply press the metal carabineer ring down and slide the handles on and off. (see figure “A”)
