

### **3 to Shave**

Find a AAA battery, is the only additional item you will need to start using your 3 to Shave product.

#### **The razor:**

1. Apply NO added pressure - just allow the razor to glide across the skin without pushing into it. 3 to Shave razor gives a high quality shaving without burn skin consequences.
2. Hold the razor firmly and direct it where you want it to go

#### **The Nose trimmer:**

The 3 to shave nose trimmer, is easy to use, you just have to turn it on.

1. Clean your nose thoroughly with a warm, wet washcloth before you use the 3 to shave nose trimmer. This will help to remove any dirt or debris that may be hiding in your nostrils. It might also be a good idea to blow your nose, too, to reduce the sneezing reflex as you cut your nose hairs.
2. Insert the 3 to shave electric nose hair trimmer at the entry of your nostrils and turn it on. Start with the lower hairs first, and trim to the point where your nose air is no longer easily visible when you look straight ahead. Use your fingers to pull the tip of your nose from side to side to trim that hard to reach area at the very front edge of your nostril, toward the center of your nose.

#### **The Hair trimmer:**

Turn the razor and you'll have the hair trimmer ready to use.

1. Keeping a mirror in front of you while you cut your hair will be a good idea
2. Hold the small clipper with the blades down and work against the direction of your hair's growth, so you can catch more hair with the guard.
3. Take care not to go too fast.
4. Run the clipper on the closest setting and clean up the areas around your ears, neck and back.
